

STORMWATER SYSTEMS

JANUARY NEWSLETTER

Happy New Epic Year From Stormwater Systems!

Although there were many great achievements last year, we all know it wasn't the best year. We want to put the past behind us, and make 2021 an epic year of growing and supporting your business!

We're doing this by increasing our product range, number of staff, installations, approved installers, and lessening our impact on the environment!

We have some very exciting announcements coming up so be sure to look out over the next few months!

We hope you all had a safe and restful holiday and are already getting into 2021,

The Stormwater Systems Team!

Come and Grow With Us!

We are looking for great people to join our team for this year. If you're looking for a new role with a team that is positive, fun, innovative and rewards success, get in touch!

BRANZ Answers Seminars

Are you wanting to stay ahead of the game and grow your knowledge in 2021? BRANZ is running a series of seminars across New Zealand to help building industry practitioners increase industry knowledge. This includes new ways of building and designing for better performance, new products, and upcoming regulation changes.

We're proud to be a sponsor of this year's BRANZ seminars!

Check out the link below to be in the draw to win 1 of 5 tickets!

We will be attending all major cities, enquire to find out exact locations.

Starting 17 February in Hamilton.

WIN 1 OF 5 TICKETS!

Auckland HomeShow 2021

24 - 28 February 2021

ASB Showgrounds, Greenlane, Auckland

From 24th-28th February we will be at the Auckland HomeShow held at the ASB Showgrounds in Greenlane. This is the perfect opportunity to come and check out our already existing Aquacomb product and see our new exciting products! Aquacomb, FenceTank, Urba and the pot plant tanks will all be on display and have special offers just for the show! Our friendly team will be there to answer all your storm and rain water harvesting questions!

WIN 1 OF 5 DOUBLE PASSES!

Southern Cross North Shore Aquacomb Installations

This week we installed Aquacomb pods at Southern Cross's hospital renovation on the North Shore. We installed 13 Aquacomb pods in the lawn to assist with detaining stormwater. We've helped solve a drainage problem because of high invert levels, where Aquacomb was the ideal, and only cost-effective solution!

Platform Homes are Saving Time, Space, and Money!

Platform Homes have made the switch to Aquacomb! Previously, Platform Homes were installing under ground water tanks in their Flat Bush development which were taking **three days** to install **each** tank!

They have now made a sound commercial decision, switching to Aquacomb pods and pumps to assist with their stormwater needs. They are now installing 2 houses (around 3,000L) worth of pods in just **three hours** saving themselves time, space, and money!

Expanded Product Range

We're growing our product range! Introducing our new innovative water storage solutions to the market! The Urba is a 800L slimline low cost water tank that can be easily linked to achieve larger volumes.

Hiding in plain site, The Camela pot plant tank is an attractive, useful landscaping item that holds 500L of water. The perfect hidden rain water harvesting solution to put in your garden!

Come and check them out at the Auckland Homeshow!
