

LEAF DIVERTER

/ FITS PLASTIC AND METAL DOWNPIPES

The WaterSmart leaf diverter is the perfect solution to capture cleaner water in your stormwater tank/system. The carefully designed rake deflects leaves and other debris from entering the system, reducing the maintenance required for your tank/system. The leaf diverter has been designed to seamlessly fit both plastic and steel 80mm downpipes and slips easily between downpipe ends, allowing for a quick and easy installation. *Leaf diverters are required by the council to be installed on each downpipe feeding the water tank under GDOI.*

/ DIMENSIONS

WaterSmart Leaf Diverter dimensions:

385mm total height x 115mm total width x 170mm total depth.

A single leaf diverter weighs 360g (350g without rake).

/ COLOUR OPTIONS

Three colours kept in stock, other colours available upon request. Please Note: Colours may not 100% match tank or downpipe colour, but will be as close as plastic polymer allows.

WHITE

GREY FRIARS

EBONY/BLACK

/ BENEFITS

Fits most standard 80mm round downpipes - plastic or metal

Quick and easy to fit - easily slips between downpipe ends

Easy clean - leaf diverter rake insert can be pulled out to be shaken clean and/or washed

Low maintenance - the angle off the rake means most leaves and debris slide right out avoiding blockages

Improves quality of water stored inside the water tank/system

Reduces chances of drains blocking

Decreases amount of tank maintenance

Colours match majority of NZ downpipe colours - Snow White, Ironsand, Ebony Black and more

Made from HDPE virgin grade plastic to withstand harsh NZ conditions

Safe for potable water

Designed and manufactured in New Zealand

Recyclable at end of life

Comes with a 10 year warranty
